

QB Networks + PSD

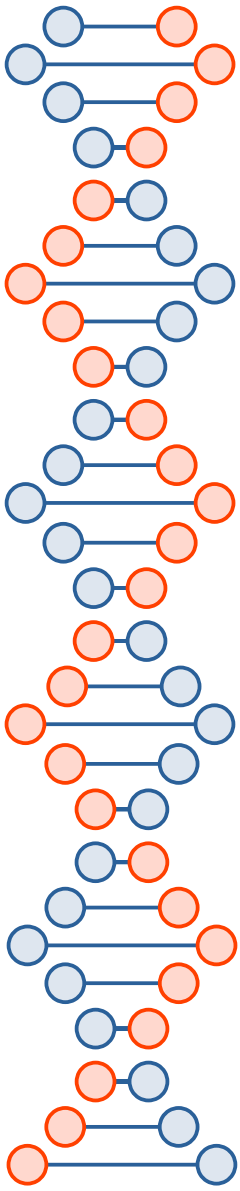

The mind behind PSD

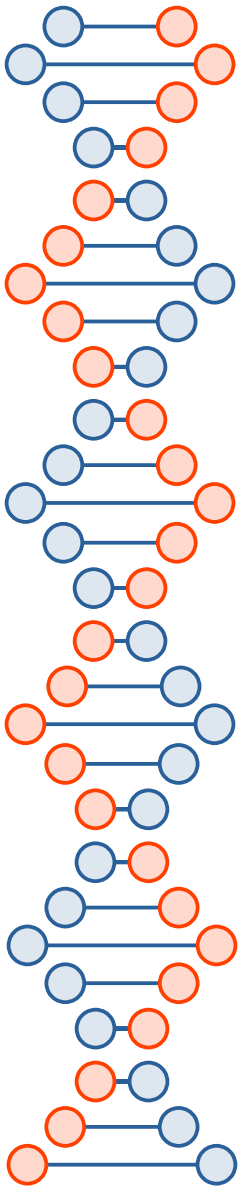

Procyberian Systems Distribution

- Support to existing projects like Linux, BSDs and Hurd
- A unique GNU distribution
- Then a unique micro-kernel based OS
- Combining Copyleft, Permissive and Proprietary projects

PSD

- AGPLv3-or-later for our codebase
- Permissive licenses are embraced to be more open
- Proprietary code projects are allowed such as device drivers or userspace applications and services
