

PSD X

Experimental Operating System that aims to
replace BSDs , Hurd , Linux, and others

PSD X

- AGPLv3-or-later kernel with GNU at first to escape from SaaS exploit
- “monorepo codebase” from hackers to end-users
- Decentralized community which works remotely globally 24/7/365
- [Forgejo](#) + [Woodpecker](#) CI/CD + [Discourse](#) forums
- PSD is built by someone like you for everyone
